- **Free Pre-Sale & Post-Sale Technical Support For Life of Equipment**

This all-in-one cost effective Patient I.D. print solution combines the reliable HC100 direct thermal printer with easy-to-load cartridges containing the only antimicrobial-coated wristbands on the market—Zebra's Z-Band® wristbands. There's minimal training required! Pop the wristband cartridge into the printer and the HC100 automatically detects the wristband size, immediately calibrates, and prints. You get long-lasting wristbands with bar codes that remain scannable for longer than the average patient stay. When the cartridges are empty, return them for recycling.

Simple to use: just insert wristband cartridge and print! Lower cost of ownership: no toner, avoid wasted bands, considerably less labor intensive than laser bands. Reduces help desk calls and maintenance & repair cost, Increase productivity with 2-simple steps-print wristband and apply to patient. Zebra's antimicrobial-coated wristbands have been tested to provide added patient protection from *S.aureus*, *E.coli*, *P.aeruginosa*, and *MRSA Type II, III, and IV*. Z-Bands meet the patient I.D guidelines of the American Hospital Association and the Health Insurance and Portability Accountability Act (HIPAA). Zebra partners with the leading Admissions Discharge Transfer (ADT) software providers to enable hospitals' easy integration of the revolutionary HC-100 wristband print solution.

For added peace of mind and a cost-effective way to plan for your annual maintenance expenditures, protect your investment with a ZebraCare™ service agreement. *If you would like to see a complete manufacturer specification sheet or wish to receive a demonstration model, please call A Bar Code Business, Inc. at 800-644-0077.*
